Technical Detail

Care and Maintenance

Every Day Cleaning

We recommend a damp microfiber cloth used with a standard household kitchen spray, such as “KOH” or “Method” should remove most stains.

Bleach Cleaning

First clean your sink as per the every day cleaning method. Then dilute bleach with water and spray on to your sink(if possible) If no spray bottle is available then add water to your sink first, then a little bleach. Leave overnight if possible, or for a few hours (do not exceed 15 hours). Then rinse/ wipe with a damp cloth to remove bleach and this should refresh the look of your Hanex Sink.

Tips to avoid damage

- Any boiling water should be collected in suitable container, for example a mug when making a hot drink.
- When pouring hot/ boiling liquids into the sink, run the cold tap prior and during pouring.
- Don't place any hot pots/pans directly into the sink. Run cold water and cool pots & pans with cold water before placing into a Hanex Solid Surface sink.

Quooker®
